

DO YOU HAVE A WEED PROBLEM?

Save time and money with Australia's first cloud-based weed detection system harnessing Artificial Intelligence and Machine Learning

Land managers

Outsmart tough terrain with precise weed geolocation data and get more from your resources

WHY WEEDREMEED?

- ✓ Configure the AI to detect multiple weed species in the landscape
- ✓ Easy and efficient to use
- ✓ Deploy using low-cost drone technology
- ✓ Cost-effective solution for all budgets and user groups from individual landholders to local councils

WEED RESPONSE**

"WeedRemeed has exceeded our expectations in its nimbleness and usability which is crucial for take-up by weeds practitioners who traditionally undertake surveillance with a less technical approach. We have tested the program on several flowering species."

Who do I contact?

Sean Freney, Business Development Manager at the Centre for Invasive Species Solutions.
